## PROFILE

"Web Designer and always seeking new and creative ideas". Passionate about Web Development and always eager to learn and explore new fields of Computer science and technology. My major skills are in HTML, CSS, C++, Python, ReactJS, App Development, and Figma. Have also explored MySQL. Being a Software Engineer, I'm an Artist too! I love to draw and paint, make occasional greeting cards, and am always curious about learning or trying, to create something unique. I'm a highly organized person who likes to organize my stuff in a proper but attractive manner.

## PROJECTS

### • Home Decor

Created a project "Home Decor", a website using HTML and CSS, the project's objective was to create an interactive and user-friendly UI.

### • Fast-Food Cafe

An HTML, CSS-based website using various CSS properties and HTML elements with multiple wireframes.

### • Automated Food Court Management System

A React-based web application with online ordering of food in the food court and a completely automated management system.

### • Real-Time Fall Detection System

A real-time system with effective and sudden fall detection in smartwatches and notification to emergency contacts.
